

Technical Data Sheet / Multistar

The Multistar machine can be equipped with different modules for various operations. It is designed for large round pail lids in flat edge or pre-curved design, plug lids or for other difficult and large curling operations.

The Multistar can be equipped with 2, 3 or 4 working stations of the following operations:

- Pre-curling station
- Curling station
- Beading station
- Lining station. Exact adjustment of the film weight is possible.

The basic machine body is manufactured in heavy steel construction. Speed of the machine is infinitely variable by electronic frequency controlled drive motor.
