

## Technical Data Sheet / Rotarystar

The Rotarystar is a machine suitable for high speed compound- lining of round ends. It can handle all common compound types like WBC-, High- Solid- or solvent compound.

All gears and curves are running in an oilbath, the speed drive is frequency controlled by an AC motor. The high duty injection guns are working electro-pneumatically with electronic injection timing units.

This machine can also be equipped with two de-stacking magazines for less change over time.
